

**Come installare WordPress con
il famoso
“One Click Install” di
DreamHost**

WORDPRESS MANIA. TRUCCHI, NOTIZIE, PLUGIN, TEMI

In questo video tutorial vedremo come installare WordPress con pochi click su DreamHost, anche senza conoscere nulla di programmazione e database!!

Siete pronti? Sì?

Allora... al lavoro! 

Current DreamHost Time: 07:15 PDT

One-Click Software Installation

Fantastico, shmantastico! DreamHost now has its very own one-click software installation!

All software listed here has been judged best in its class by us, not to mention being open-source and completely free!

You are also responsible for upgrading your old installations (you can do it from here!) should any critical security holes be discovered!

We do not provide technical support for this software beyond the initial installation. For technical support, contact the software authors at the official sites linked below.

[Read more in our Wiki!](#)

Upgrades

Upgrade
data
inst

Dal pannello di controllo di DreamHost seleziona la voce "One Click installs"

the same URL, using the same
done any template
have to re-install them!

Remove
the inst
do that, w

the URL chosen, and remove
any databases. If you want to

If an installation is **not listed** below, it's either because (A) you didn't originally install it from here, (B) the database it was installed on is now inactive, or (C) the domain you installed it to has moved since the installation. Unfortunately, if an install is not listed below, we cannot upgrade it for you!

What software would you like to install?
